

Hands on Science

Embedding science into your program for three and four year olds

This session will give you some practical ideas so that you can scaffold children's learning dispositions and build a love of science and discovery.

Chemistry, physics and biology are big words, but even young children can engage in rich scientific learning, through holistic approaches to planning, and engaging learning environments.

Wednesday, 9th May 2018

9.30am - 12.30pm

Cost: \$88

Location:

Thebarton Community Centre
cnr South Road and Ashwin Parade, Torrensville

Facilitated by: Rose Tramontin
